

# Abdiaziz Mohamed Abdi

PETROLEUM ENGINEER (MSc) · DRILLING & WELL OPERATIONS · HSE

Doha, Qatar   anwernuur@gmail.com   +974 3349 3961   [linkedin.com/in/abdiaziz-petroleum](https://www.linkedin.com/in/abdiaziz-petroleum)   [Portfolio](#)

Petroleum engineer with an MSc and direct rig-floor experience from a live spud-to-TD drilling campaign in Somalia (~90 operational days, 100% zero-incident record). Strong in drilling operations, well control, mud engineering and HSE documentation. IWCF, NEBOSH and OPITO BOSIET certified. Seeking drilling or well-operations roles in Qatar, Saudi Arabia and the wider MENA region.

## EXPERIENCE

### Petroleum Engineering Intern — Drilling Operations

On-Site Well Drilling Projects · Somalia   Nov 2022 – Feb 2023

- Maintained a 100% zero-incident safety record across a full spud-to-TD campaign (~90 days), supporting rig-floor coordination for a 10+ person crew.
- Held 6 mud-system parameters within  $\pm 2\%$  of spec, preventing 3 formation-damage risk events.
- Delivered 90+ Daily Drilling and mud reports with no data gaps, cutting shift-start lag by 15–20 minutes per rotation.
- Achieved 100% BOP function-test compliance before every critical well phase; facilitated JSAs and toolbox talks under permit-to-work systems.

### Research Assistant — Hydraulic Fracturing

Cyprus International University   Feb 2024 – Jun 2025

- MSc thesis on optimising hydraulic fracturing through microseismic monitoring, validated against two field case studies.
- Applied machine-learning methods to microseismic event detection, localisation and noise suppression.
- Built proficiency in Petrel for reservoir modelling and cementing operations.

### Volunteer Field Engineer — Community Water Wells

Community Water Projects · Somalia   Jan – Feb 2023

- Delivered 2 wells from spud to commissioning in 6 weeks, extending clean-water access to 500+ residents.
- Executed casing installation, pump testing and wellhead assembly with zero post-commissioning failures.

### Geology & Geophysics Intern

Cyprus Geological Survey · Nicosia, Cyprus   Aug – Oct 2022

- Supported geophysical data acquisition across 4+ site investigations, operating seismic and resistivity equipment.
- Processed and quality-checked geotechnical datasets for 4 construction projects.

## EDUCATION

### MSc Petroleum & Natural Gas Engineering

Cyprus International University · 2025

## CERTIFICATIONS

- IWCF Well Control
- NEBOSH General International Certificate
- OPITO BOSIET with EBS
- OPITO H2S Basic (9014)
- Rigging & Lifting Equipment and Devices

All current; verification on request.

## SKILLS

- Drilling operations, well control, mud engineering
- HSE leadership — JSA, PTW, toolbox talks
- BOP function testing, tripping, drill-pipe handling
- Reporting — DDRs, mud reports, technical writing
- Petrel, Landmark, AutoCAD, Arduino, MS Office
- Languages — English (fluent), Arabic (fluent), Somali (native)

## PROJECTS

### Downhole permeability sensor

Built a working 12-inch prototype measuring permeability in-well.

### Cement sheath integrity (HPHT)

Acoustic integrity testing under HPHT loading; 12 sensors, 3 planes.
